CONFIDENTIALITY/EMAIL NOTICE: The material in this document contains confidential and privileged information intended only for the addressee. Do not distribute, copy, forward, or disclose the contents of this document without the express consent of Valkeen GmbH.

OVERVIEW

1. User Access:

Tempus access will vary based on the setup of each individual user (managed by your Admin team) Resources who require access can login via SSO and will be assigned a user role and security group

2. Resource Types:

There are two types of resources that can be setup in Tempus

- Named resources: Individuals allocated to projects and/or setup as Tempus users
- Demand Planning resources: Unnamed resources; generic placeholders for a team or role, used solely for planning

3. Project Types:

There are three types of projects setup in your Tempus instance

- a. Standard projects: "Interrelated tasks organized together in order to reach a specific outcome"
- b. Opportunities: Projects in the proposal phase, still pending approval.
- c. Non-Project Activities projects: Absence, Admin, Run, Change, etc.

4. Assignments

Assignments are created by linking a Resource to a Project

- a. Assignments must include a specific number of time units (Hours, FTE, Mandays, etc.)
- b. Assignments can be created for one project at a time, or for multiple projects at the same time
- c. Assignments can be applied to the Project (generic task) or to individual named tasks

5. Resource Request Workflow

Resource Managers must always approve assignments.

- a. Applicable resources are assigned **Resource Managers**.
- b. A resource request can be generated in the following cases
 - New allocation of a resource, or
 - Update to previously approved allocation
- c. A **Resource Manager** must review the request, and take one of the following actions
 - Approve, replace, or reject a request
 - Update request prior to approval (assign different resource, distribute assignment among several resources, etc.)

CONFIDENTIALITY/EMAIL NOTICE: The material in this document contains confidential and privileged information intended only for the addressee. Do not distribute, copy, forward, or disclose the contents of this document without the express consent of Valkeen GmbH.

COMMON TEMPUS SHORTCUTS

- Tempus grids utilize the following Excel-like
 - Column data can be sorted by clicking the column header
 - Cell data can be copy-pasted via **Ctrl+C** and **CTRL+V**
 - Cell data can be copied across or down by selecting the “+” icon (lower right corner of cell)
- Tempus utilizes several icons (across multiple screens) to represent specific functionality:
 -  Trash Can: Delete selected item(s)
 -  Pencil: Edit/View selected item
 -  Copy/Clone: Copy selected item to clipboard OR Clone selected item
 -  Lock/Unlock: Indicates whether the selected record is locked by another user
 -  Export To: Standard icons for Excel, CSV, or PDF display when applicable
 -  Filter: Filter results based on specified values
 -  Notification: Listed item may need attention (filters, new requests, etc.)
 -  Listed record is a Demand Planning resource (generic, role-based)
 -  Listed record is a Proposal

TEMPUS RESOURCE NAVIGATION

Tempus Resource is an easy to use tool with an intuitive user interface. This section covers the three aspects of navigating Tempus – Logging In, different areas of the Homepage and Main Task Bar, and Subscribing to notifications.

LOGGING IN

1. Navigate to Tempus Resource using your web browser) Google Chrome is the recommended browser.
2. Click on the orange button **Knauf SSO Login**

3. Sign in using your standard credentials.

HOMEPAGE

1. All PM users will have access to 3 tiles on the homepage. Click on any tile to navigate to the relevant page.

2. The below table provides a high-level description of actions users can perform behind each tile. *Note: The actions may vary depending on each user's role and access permissions.*

Tile name	Description
Project Management	- View project repository - View/Create/Edit assignments on individual projects
Bulk Project Allocation Flatgrid	View/Create/Edit assignments on multiple projects

3. The blue ribbon along the top (Task Bar) is available from all screens in Tempus.

- Click on the Tempus logo to the left to return to the homepage from any screen
- View notifications by clicking on the bell icon 
- Locate a specific project via Global Search 

- Navigate to any area of the tool via the hamburger menu 

- From the username menu, set up in-app **Subscriptions** or **Logout**.

RECOMMENDED NOTIFICATION SUBSCRIPTIONS

There are 2 spaces with recommended notifications for Project Managers.

1. In the **Project** tab, **Add projects** to be notified for. Do **not** select all projects as each will need to be unsubscribed from manually.

- Subscribe to be notified for 3 notifications highlighted below.

Project name	Attributes	Allocations	Build Team	Financials	Milestones	Snapshots	Sheets	Schedule	Deleted
AP03211-BKK BH5 CC6 NEW ICS In...	✓	✓							✓

- **Attributes** will notify you of any updates to project attributes.
- **Allocations** will notify you of any updates to project allocations.
- **Deleted** will notify you of when a project is altogether deleted.

- To unsubscribe from a project, click

2. In the **Resource Request** tab, choose to be notified for any specific (or all) outcomes of a resource request submitted by you.

	Approved	Delegated	Partially approved	Rejected	Submitted	Replaced	Partially replaced
Resource request (submitter)	✓	✓	✓	✓	✓	✓	✓

PROJECT MANAGEMENT GRID

Click the **Project Management** tile to open the Project List, where you have access to the entire project repository.

GRID OVERVIEW

1. There are various options to customise the Project management grid.

- **Search** for a project or projects by name via the search field, which uses “contains” logic.
- **Filter** projects by applying as many filters as needed.
- Add or remove **Columns**.
- **Group** projects based on any attribute(s). Each grouping level will display the group by attribute, attribute value, and the count of projects contained in the grouping.
- Use **Quick filters** to navigate to relevant projects e.g., “my projects” will show projects where the logged in user is assigned as the Project Owner

2. Open the **View Management** dialog by clicking on the view name to the right of the **Group By** option.

- Create a new view by clicking **Create view**

CONFIDENTIALITY/EMAIL NOTICE: The material in this document contains confidential and privileged information intended only for the addressee. Do not distribute, copy, forward, or disclose the contents of this document without the express consent of Valkeen GmbH.

- **Lock** a view in its current state by
- Select a **Default** view by clicking
- **Edit** a view by clicking 
- **Clone** a view by clicking 
- **Delete** a view altogether by clicking

3. **Public views** are denoted by the blue eye shaped icon 

These views cannot be edited in any way as they are administratively defined.
Always clone a public view using the copy  into it.
icon 

, and then click into the newly created view to start working

4. Project navigation using Advanced Tooltips

Hovering over any project name in the Project Management grid will reveal all areas of the project that the user has access to. Clicking on any area will navigate directly to the selected area of the project.

VIEWING PROJECT ATTRIBUTES

1. Clicking on any project name in the grid will navigate to the Individual project screen.

2. From the top-right corner of the screen, navigate to **Attributes** to view attributes.

User Guide

SINGLE PROJECT ALLOCATION GRID

1. Clicking on any project name in the grid will navigate to the **Single Project Allocation** grid by default.

2. Once a project has been created, and a valid date range has been entered, the **Single Project Allocation** grid will become available.

GRID OVERVIEW

1. The **Project Name** and **Checkout** button is located at the top of the grid. To make any changes to a project, it must first be checked out.

2. Basic options to update the grid are in the ribbon below the project start and end date.

- **Expand** the grid with one-click by clicking on
- **Search** for an assigned resource when the grid is grouped by Resource and for a task name when the grid is grouped by Task.
- **Group by** either Resource or Task.
- **Insert Columns** to view project, resource, or assignment attributes.
- Update **Time Granularity** by which allocations are displayed. **Month** is the recommended granularity for Knauf.

CONFIDENTIALITY/EMAIL NOTICE: The material in this document contains confidential and privileged information intended only for the addressee. Do not distribute, copy, forward, or disclose the contents of this document without the express consent of Valkeen GmbH.

- Choose the **Capacity unit** in which **Hours** is the recommended unit for Knauf.

3. Advanced grid options can be found in the **Options** menu in the ribbon below the project timeframe.

- Enabling the **Total Column** will display a column with total Hours or Mandays. When viewing the grid in FTE or FTE%, it will display the average.
- A **Resource Heatmap** will display colours based on overall allocation% of a resource.

- A **Resource Request Heatmap** will display colours based on the resource request status.

-
-
-
-

Enabling **Overlay Heatmap for Rows** will apply the selected heatmap on individual grid rows. Enabling **Overlay Heatmap for Groups** will apply the selected heatmap on groupings.

Tasks to Show will filter tasks and hide the task

CREATING RESOURCE REQUESTS

1. Click **Checkout** next to the Project Name at the top to make any edits to the project.

2. Expand the grid by clicking on  above the **Name** column in the grid.

3. To **add a single resource**, click on a blue cell reading **Type a new resource** to start typing the name of the

resource or select a resource from the dropdown.

Type-ahead functionality narrows down the available resources to simplify resource loading.

CONFIDENTIALITY/EMAIL NOTICE: The material in this document contains confidential and privileged information intended only for the addressee. Do not distribute, copy, forward, or disclose the contents of this document without the express consent of Valkeen GmbH.

User Guide

4. To **add multiple resources** to one or multiple tasks, click on **Add assignment** to reveal the **New Assignment** dialog. Choose resources to the left and tasks to the right and click **Add**.

5. To **create a new task**, scroll down to the end of the Task list to reveal a green row with the option to **Type a new Task**. Enter the name of the new task and hit enter or click the checkmark to the right of the cell.

6. Enter any relevant assignment attributes like Module, Role, Skills, Additional comments.

Name	Module	Role	Skills needed	Additional Comment
PMO / Test Mgmt				
*Project Manager				
Kathrin Dorn	Data Migration	Data Analyst		

7. Enter the allocation in Hours on a monthly level. Values can be copy-pasted or clicked and dragged.

Apr 24	May 24	Jun 24
170	120	40
80	40	40
90	80	0

8. To request additional capacity from a named resource that has already been allocated to a project, enter the new total requested allocation directly in the grid.

9. To save changes, click **Save and Check In** or **Release** them to revert to the previous state.

BULK PROJECT ALLOCATION FLATGRID

The Bulk Project Allocation Flatgrid (BPA Flatgrid) is particularly useful for project managers owning multiple projects

at the same time. To access the BPA Flatgrid, click on the **Bulk Project Allocation Flatgrid** tile.

GRID OVERVIEW

1. Located at the top-left, is the **Project timeframe**, which can be easily amended by the date-picker. Additionally, there is a quick-select menu revealed by clicking  to choose from.

next to the End date with popular timeframes

2. Towards the top-centre, is the **Resource and Project** menu, with 3 modes for entering data –

- **Project** – Recommended mode for Project Managers.
Only projects can be selected. Only projects that coincide with the grid timeframe and with planned allocations will appear in the list.
- **Resource** – Recommended mode for Resource Managers.
Only resources can be selected. Only resources with planned allocation during the grid timeframe will appear in the list.
- **Default** – Recommended when updating allocations or adding assignments to resources not already assigned to a project.
All projects and resources that the user has access to can be selected.

3. To the top-right, is the **View Management** dialog.

- Create a new view by clicking **Create view**
- **Lock** a view in its current state by clicking 
- Select a **Default** view by clicking 
- **Edit** a view by clicking 
- **Clone** a view by clicking

CONFIDENTIALITY/EMAIL NOTICE: The material in this document contains confidential and privileged information intended only for the addressee. Do not distribute, copy, forward, or disclose the contents of this document without the express consent of Valkeen GmbH.

User Guide

- **Delete** a view altogether by clicking 

4. Basic options for customisation are in the ribbon above the grid.

- **Expand** the grid with one-click by clicking on 
- **Insert Columns** to view project, resource, or assignment attributes in the grid.
- **Group by** any project, resource, or assignment attribute.
- Update **Time Granularity** by which allocations are displayed.
Month is the recommended granularity for Knauf.
- Choose the **Capacity unit** in which allocations are entered/displayed.
Hours is the recommended unit for Knauf.

5. Advanced options for customisation are in the Options menu in the ribbon above the grid.

- **Overlay Heatmap**
 - *Resource Heatmap* will display colours based on overall allocation% of a resource.
 
 - *Resource Request Heatmap* will display colours based on the resource request status.
 
 - *Non-Zero Heatmap* will display non-zero cells in blue
- **Hide Task** will hide the task column in cases where it is not relevant
- **Show Total Row** will insert a row with total allocations at every aggregation level.
- **Show Total Demand Planning** will display total allocations on Demand Planning or Generic Resources.
- **Show Named Total** will display total allocations on all Named Resources.

CONFIDENTIALITY/EMAIL NOTICE: The material in this document contains confidential and privileged information intended only for the addressee. Do not distribute, copy, forward, or disclose the contents of this document without the express consent of Valkeen GmbH.

User Guide

- **Show Unallocated%** will display the percentage of assignments to be redistributed from Generic Resources to Named Resources.
- **Show Selection Calculations** will display *Average, Sum, Min, Max, Count* for a grid selection
- **TaskstoShow** can filter the grid by task type – Generic (Project-level) or Non-Generic (Custom tasks) • **Weekly Display Format** will display weeks in the chosen format – Week number, Start date, End date • **Filter by Resource Request Status** allows to filter the grid by a specific status.

6. Every column has a filter icon that allows to filter across resources, projects, and other inserted columns

7. A blue triangle in cells containing project and resource names opens a view only modal window for all project/resource attributes

8. Hovering over a Project or Resource name reveals a hyperlink.

Clicking on the link will redirect to the dedicated Project or Resource page in a new browser tab

CREATING VIEWS USING A PUBLIC VIEW

There is 1 public view available to Project Managers to use as a reference point for creating their own views called **For SAP PMs**.

1. From the View management dropdown, clone the **For SAP PMs** view and click into the newly cloned view.

2. Ensure that the correct timeframe has been selected.

Open the **Resource and Project** menu by clicking on it.

CONFIDENTIALITY/EMAIL NOTICE: The material in this document contains confidential and privileged information intended only for the addressee. Do not distribute, copy, forward, or disclose the contents of this document without the express consent of Valkeen GmbH.

User Guide

3. Locate project(s) by typing in the name in the search field next to **Projects** or apply a project filter to see multiple projects meeting the same criteria.

Only projects with planned allocations during the timeframe selected will appear in the Projects list. Select projects from the list. Assigned resources will be auto selected to the left.

4. The BPA Flatgrid will display a dedicated row for each Resource-Project-Task combination. Existing allocations will appear in **Hours** on a monthly level with a Resource heatmap applied.

Resource name	Project name	Jan 24	Feb 24	Mar 24
SD *SHS IT SAP CMG PR&D	1S2L_PRJ_B2_INF Identity Management	5	0	0
TR Thorsten Rinner	1S2L_PRJ_B2_INF Identity Management	0	0	0
CR Christian Reutzel	1S2L_PRJ_B5_SAP Implementation of Group Chart of Account in EHP System	23	21	21
HH Harald Hildebrand	1S2L_PRJ_C2_SAP SAP System Compliance Measures adapted by Varian & Sunset SAP GRC	23	21	21

ACTIONS IN THE BPA FLATGRID

Project Managers can perform 3 actions in the BPA Flatgrid. Each of these actions is outlined below.

UPDATE EXISTING ASSIGNMENTS

1. The BPA Flatgrid will display a dedicated row for each Resource-Project-Task combination. To update an assignment, click into a cell and update the value.

84	88
33,6	35,2
168	176

2. Click **Save** at the top of the grid to save changes and trigger a new resource request.

CONFIDENTIALITY/EMAIL NOTICE: The material in this document contains confidential and privileged information intended only for the addressee. Do not distribute, copy, forward, or disclose the contents of this document without the express consent of Valkeen GmbH.

ADD NEW ASSIGNMENTS

1. Click on **Add assignment**.

Select a Project, a Resource, and a Task and click **Add new assignment**.

2. To select a resource not already assigned to a project, select the checkbox **Allow new Resources** from the Resource dropdown.

3. To create a new task not already present in the project, enter the name of the task and click **Add new Task**

4. A new row with the Project-Resource-Task combination will appear in the grid. To add assignments, click on a cell and enter the assignment value.

Resource name		Project name	Jan 24	Feb 24	Mar 24
SHS IT SAP CMG PR&D		1S2L_PRJ_B2_INF Identity Management	5	0	0
Christian Reutzel		1S2L_PRJ_B5_SAP Implementation of Group Chart of Account in EHP System	23	21	21
Christian Reutzel		1S2L_PRJ_B2_INF Identity Management	0	10	0

5. Click **Save** at the top of the grid to save changes and trigger a new resource request.

CONFIDENTIALITY/EMAIL NOTICE: The material in this document contains confidential and privileged information intended only for the addressee. Do not distribute, copy, forward, or disclose the contents of this document without the express consent of Valkeen GmbH.

VIEW PENDING RESOURCE REQUESTS

1. From the bottom of the **Options** menu, select the dropdown next to **Filter by Resource Request Status**

2. Select the checkbox next to **Pending**. The grid will automatically be filtered to only show pending requests.

CONFIDENTIALITY/EMAIL NOTICE: The material in this document contains confidential and privileged information intended only for the addressee. Do not distribute, copy, forward, or disclose the contents of this document without the express consent of Valkeen GmbH.
